1. On 12 May 1953, the Grundbau Geophysik section of the Forschungsanstalt fuer Schiffahrts-Gewaesser-und Bodenkunke (research institute for shipping, marine and soil sciences) placed a request through its material procurement office for
 - a. the procurement from the Schoenow-Bernow plant for 250 meters of special microphone cable, 2 x .5 mm; and
 - b. 40 meters of rubber insulated cable 4 x 6 mm NSH, from the Kabelwerk Obersprees.
2. The operation of a newly constructed scientific research device (research assignment K 3/17) for dynamic foundation investigations depends on the procurement of the above cables.
3. The 4 x 6 mm rubber insulated cable is needed to connect a 7 HP electric motor which powers the device.
4. The special microphone cable is to be used to connect a piezoelectric device to an oscillograph via a multiple-stage amplifier. The use of a protected weather-proof cable is essential, otherwise, inaccurate results would be obtained.
